(Herman Miller)

Date Completed:
January 2001

Project Description: Equant International, with headquarters in Atlanta, London, Paris and Amsterdam, is an industry leader in global IP and data services for multinational businesses. In Atlanta, Equant retained Project Management for the \$21 million construction of a 189,569-sf corporate office headquarters and network operations center.

- Approach:**
- Consolidated headquarters elements from several different locations.
 - Manage premises construction, loose and systems furniture procurement, data/telecommunications infrastructure installation, audiovisual systems procurement, and security installation.
 - Oversee criteria development, design and construction of a data center and network operations center.

- Results:**
- During the design phase the client added the data center and network operations center to the scope and accelerated the schedule.
 - Project was completed per the accelerated schedule at a savings of \$1.2 million under the approved budget.
